

It is very important for businesses to provide effective hand care solutions for employees that help to maintain hygiene standards and provide a caring environment for staff. In a number of industries hands can become irritated through the nature of the work that is undertaken and the chemicals employees may come into contact with. If this is the case in your business, then it is vital that effective hand care solutions are in place to ensure staff welfare.

The Deb 3 Step Hand Care System may just be the hand care solution your business needs.

## Benefits of Deb 3 Step Hand Care

The Deb 3 Step Hand Care dispensing system [2] offers a highly effective hand care solution. The system is made up of 3 separate dispensers, which all provide a different hand care solution. The dispensers are in different colours to make the different solutions easily identifiable. Each individual dispenser will contribute step-by-step to providing a complete hand care solution, helping to prevent occupational skin damage such as dermatitis.

There are a number of benefits of the 3 Step Hand Care System by Deb, including:

**Ease of use** - each individual dispenser has 'how to use' illustrations printed on it to ensure that the right technique is used by staff when applying the solution.

**Convenient** - the dispensers can be wall mounted to provide a compact and highly convenient hand care solution to employees on-the-go.

**Easy maintenance** - the dispensers themselves are designed with hygiene in mind. The dispenser's smooth surfaces can be easily wiped clean to prevent cross contamination. The dispensers also have a viewing window to ascertain fill level.

**Highly durable** - the dispensers are made from robust, lightweight plastic, making them ideal for high usage areas. The dispensers will provide a long-term hand care solution to your staff.

## The 3 Step Hand Care System Explained

### Step 1 ? Protect

The first dispenser, coloured orange, is filled with a pre-work cream that helps to protect the skin against contact with various workplace contaminants that could be potentially hazardous to the skin.

### Step 2 ? Cleanse

The second dispenser, coloured red, offers a fragrance free and emollient rich washing lotion, which cleanses hands to ensure that they are physically clean. It is important that employees are able to effectively wash their hands to remove harmful chemicals and germs.

### Step 3 ? Restore

The third dispenser, coloured in green, provides an effective skin disinfection solution, helping to protect and restore skin after potentially coming into contact with irritants.

## **Effective hand care solution**

The 3 Step Hand Care System from Deb provides an effective hand hygiene and care solution, ideal for companies where employees may come into contact with irritants that could contaminate skin. It is important that hygiene standards are maintained in a building and that employees are provided with the necessary facilities to clean and protect their hands from contamination.

Implementing Deb 3 Step Hand Care [2] dispensers provides a cost effective, convenient and robust hand care solution that could have a positive impact on the wellbeing of your staff.
