

Effective Handcare

Minimises cross contamination
And supports a clean and
Healthy washroom

Three Simple Steps To **Reducing The Risk Of Spreading Bacteria**

Delivering Effective Handcare

One of the simplest yet most important requirements for your premises is the provision of effective hand washing and drying.

With greater awareness of the presence of germs and the spread of bacteria on contact, it is **more important than ever** to ensure you are doing all you can to **safeguard the wellbeing of people** on your premises.

A **clean and efficient** washroom promotes **healthier handcare** routines which, in turn minimises the potential for cross contamination and **reduces the risk of illness**.

People are more likely to use clean and hygienic soap dispensers and the Citron Hygiene professionally managed service ensures your refills will never be empty. The standard of your washroom says a lot about your organisation.

Make sure it's positive!

to effective handcare

STEP ONE

Promote Regular Handwashing

If your dispensers look nice this will encourage regular hand washing.

Our range of **stylish dispensers** will complement your facilities dispensing a range of high quality, luxurious foam soaps. Washroom users will wash their hands more often thereby **killing harmful bacteria**.

Minimal packaging for our refills helps to reduce the environmental impact. **Designed for durability** the stylish Citron Hygiene range of dispensers will look great for longer and dispense correctly time-after-time.

Manual Soap Dispenser

- Choice of foam soap depending on preference: Standard, Dermo (for sensitive skin) and Anti Bacterial.
- Push rather than pull operation reduces the risk of the dispenser being pulled off the wall.
- New nozzle with every refill prevents clogs and drips. The one-way dispensing valve prevents any cross contamination.
- Hygienic dispensing lever contains Polygiene® antimicrobial technology that starts to kill microbes on contact and stops the spread of bacteria.

Auto Soap Dispenser

- Touch free operation encourages healthy hand washing and eliminates cross contamination helping to reduce the spread of bacteria.
- Enriched foam soap containing moisturisers and delivers a high quality, luxurious wash experience.
- 1100ml providing 2,750 hand washes per pouch.
- A new pump with every refill ensures no mess, clogs or leaks.

STEP TWO

Provide Effective Hand Drying Options

Effective Hand drying is extremely important

Wet or damp hands spread bacteria rapidly. In environments where people can be **vulnerable to infection** washing and **drying hands** correctly can **literally save lives**. We offer a full range of options, all of which are managed by Citron Hygiene.

Our range of stylish and energy efficient hand dryers provides a cost effective and hygienic option for all washrooms

The **Citron Airjet** is our 'hands in' option and **operates from just 550W**. It is listed on the Governments Energy Technology List for Enhanced Capital Allowance.

The **Citron Airelle** is ideal for high use areas and has achieved the **Quiet Mark accreditation**. It is robust enough to cope with the demands of high footfall yet still looks incredibly stylish.

The **Eco Dryer** completes the range operating from just 900W it's one of the most **energy efficient** hands under dryers available.

Our trained engineers can easily replace old hand-dryers with our energy efficient range.

You will see the **benefits** in **reduced energy** use immediately and your **washrooms will look great**.

Citron Eco Dryer

- Dries hands in 10 seconds
- Energy efficient at just 900W
- Quiet operation at 73dB
- Infra red sensors provide a hygienic touch free operation
- CE and WEEE approved

Citron Airelle

- High Speed dries hands in under 13 seconds
- Compact - ideal for areas where space is limited
- No touch - infrared sensor for automatic operation
- Modern design - to complement any décor
- Robust aluminium and steel construction - durable and perfect for all high traffic washrooms
- Energy efficient - uses only 1.4KW of power at 240V
- Designed to be kind to the environment
- CE Approved - safety test approvals from the German safety agency VDE

Citron Airjet

- Operates at an energy efficient 550W (Unheated)
- Dries hands in just 10 seconds
- Compact, stylish design provides easy cleaning and low maintenance
- Anti-microbial treatment for areas in contact with water prevents cross-contamination of bacteria
- Larger hand drying area for ease of use
- Upper and lower sensors detect hands being placed in and removed for optimum efficiency
- New wave pattern air jets and triangular silencer ensure the quietest operation
- Drain Tank collects waste water for a drip free washroom protecting floors and wall coverings

Paper Towels and Roller Towels

Where electric hand dryers are not an option, we can offer managed paper towel dispensers and roller towels.

Whatever your requirement there is a paper towel dispenser to suit your needs. Whether individual sheets, rolls or centre feeds we will supply and fit the dispensers and you can order the paper refills direct from us. A **simple process** carefully **managed by Citron Hygiene**.

Roller towels are an **efficient** and **low cost** method of hand drying. The Citron exchange service collects used towels and replaces them with **professionally laundered** and **hygienic fresh** towels. With no electricity requirement they can be conveniently placed in any location.

Roller Towels

- A hygienic fresh portion of towel is dispensed for each user
- Used towel is kept separate from the clean towel by the internal mechanism to prevent cross contamination
- Robust – units are durable and designed to withstand heavy usage
- No mess or wastage
- Roller towels are available in white/blue striped or plain white, as standard.
- Serviced regularly by Citron Hygiene.

Sanitise to Help Stop The Spread of Germs

Ideal for locations where soap and water are not available hand sanitisers provide a means to **kill bacteria** on hands.

Available in both alcohol and non alcohol formulations there is a solution for all locations. Proven to **kill up to 99.999%** of bacteria.

They come in different finishes to complement your washroom décor and they can be installed anywhere.

Hand Sanitiser

- Kills 99.9% of harmful bacteria such as MRSA, Influenza, E-Coli and Salmonella, to help prevent the spread of disease
- Fast drying foam formulation – easy and quick to use
- Hygienic dispenser – dispensing push lever incorporates Polyglene® antimicrobial technology that kills microbes on contact to break the transmission path of diseases
- Non-drip refill with own nozzle and one way valve to prevent mess and cross contamination

The Citron Hygiene Promise

Citron Hygiene has developed a unique and integrated approach to delivering outstanding hygiene solutions for your washrooms and throughout your organisation.

This approach is designed to meet your specific needs and support the well-being of your staff, customers and other stakeholders. We also underpin your corporate and social responsibilities and support your brand. We offer great value solutions that work every time and that stand independent testing to the very highest hygiene standards.

We have a **comprehensive range of products** and services to meet your hygiene and energy saving needs.
