

## Waste Bin Colour Coding

### Yellow Lid Bins

Waste sharps materials with possible medicinal product residue.

### Blue Lid Bins

Medicinal waste in its original packaging - usually unopened. Examples include out of date medicines in bottles or containers and denatured drugs.

### Orange Lid Bins

Items that are contaminated with bodily fluids or organic tissues; sharps, wipes, dressings & gloves.

### Purple Lid Bins

Waste that is contaminated with cytostatic and cytotoxic medicinal products.

### Red Lid Bins

Anatomical waste such as organs, body parts and blood bags.

### Yellow & Black Bins

Non-hazardous hygiene waste, such as; nappies, wipes, gloves & any garments with non-infectious body fluids.

### White Bins

Amalgam & Gypsum Dental waste for dental study moulds.

### Black Bins

Municipal (domestic) waste such as; food and drink packaging, newspaper, fruit and tissues.

### Yellow Tiger Bags

For the disposal of offensive waste such as personal protective equipment and lateral flow devices.
