

## **Coventry & Warwickshire Partnership Trust [1]**

Clinical, Medical & Dental

This NHS Trust employs over a 1,000 people in the region. With a vision to improve the wellbeing of the people they serve and to be recognised for always doing the best they can.

Having heard of the great reputation that Citron Hygiene has built in over 40 plus years, the Trust turned to us for the provision of cost effective feminine hygiene services, nappy disposal and fragrance units.

By choosing these disposal services the Trust takes advantage of the protection provided by the best germicide available on the market. This provides outstanding defence against bacteria, protecting patients and employees on the Trust?s premises. Combined with the excellent monthly service which provides a fresh and sanitised unit with each visit, the Trust is confident that they have secured the best solution for their needs.

Jane Barlow the Trust?s Logistics Supervisor is quick to recommend Citron Hygiene and rate us highly for service, value for money and breadth of range.
