

## **Lancashire Care NHS Foundation Trust [1]**

Washroom Care

LCFT's mission is to provide an excellent service that is both cost effective and quality driven. It is critical for them to procure value for money services which are both fit for purpose and meet all the necessary legislative criteria.

The Trust wished to secure a more robust system of waste collection and disposal which demonstrated compliance and assurance to external auditors and inspectorates.

As a Foundation Trust it is important to promote and protect their image as a role model. Therefore, all business dealings must be transparent, demonstrating quality, value for money and integrity. The Trust found that Citron Hygiene has a sound track record of achieving and maintaining high quality services. Reliability and continuity are an absolute necessity and the Trust felt strongly that Citron Hygiene was able

to demonstrate this.

?The Trust feels the most important singular benefit of working with Citron Hygiene is the flexibility of service and the readiness and ability to accommodate ad-hoc requests? commented John Pascoe, Property Compliance Manager at the Trust.

Citron Hygiene is proud to support the Trust with Clinical Waste services, Sharps collection and disposal plus Feminine Hygiene services
