

## Delivering total washroom management to hotel [1]

### Washroom Care

Jurys Inn, a specialist city centre hotel group, was looking for a complete washroom management solution, so they turned to Citron Hygiene to help them maintain the high standards they set in their public washrooms. With 25 sites across the UK it was vital that we delivered perfect planning during the mobilisation process backed up by constant service excellence from day one. By tailoring our services for the hotel chain across all their sites, we have delivered significant cost savings for Jurys Inn from toilet rolls to water and energy savings. Switching to our Mini Jumbo toilet tissue and dispenser provided a 29% annual saving. Our Actiflow Water Management System, which combines microbiological urinal cartridges with a cistern flush controller, reduced their water consumption by up to 90%. The billions of good bacteria contained in the cartridges also proactively work to prevent blockages and malodours. Reputation is

everything in the hotel sector. We are able to support Jurys Inn's reputation by delivering an outstanding washroom service provision with stylish products. Our chrome range of dispensers and dryers helps to convey a contemporary feel within their washrooms. Delivering what we promise every time is fundamental to our success with hotels. This includes our discreet feminine hygiene service that ensures a fresh clean unit every time. Each unit contains Activap?, our unique vapour action germicide designed to eliminate odours and minimise the spread of germs. Our services, tailored to Jurys Inn, include feminine hygiene, hand washing and drying, water management and washroom vending options. If you demand the highest standards from your suppliers then talk to Citron Hygiene about how we can transform your washrooms whilst delivering excellence and cost savings.
