

Actiflush

Reduce water usage by 90%

Retrofit traditional toilets with the Actiflush button and significantly reduce your water usage with a variable flush system.

Why should you install Actiflush?

Save Money

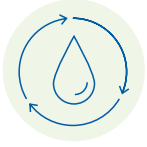

By reducing your water usage by up to 90% you will be saving your business money on utility bills.

Efficient Water Usage

Many 9L cisterns actually use more than that. The Actiflush button only uses 1L per flush.

Environmentally Sustainable

Protect precious water resources and decrease your business' impact on the environment.

Product Overview

Easy Use

- ✔ Fits in spare flush hole of toilets and links to the siphon
- ✔ When the button is pushed, it breaks the air lock and the flush is stopped
- ✔ If the flush is stopped too early, the handle can be pushed again and the flush will continue as there is water still in the cistern

Reduce Costs

- ✔ Provides significant cost savings
- ✔ The Actiflush button is designed for toilets enabling full flushes and part flushes
- ✔ Easily fitted by Citron Engineers and serviced by Citron Hygiene Technicians
