

Intelligent Water Management System

Save up to 90% on water usage

The Intelligent Water Management System enables customers to fully programme urinal flushing in real time for ultimate control.

Why use Intelligent Water Management?

Save Money

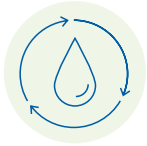

Easily identify hidden issues in your water system, such as leaks or malfunctions, that are causing water to be wasted, and save on unnecessary water usage.

Efficient Water Usage

The smart meter can be fitted to urinal, toilet and tap water supplies, and monitors usage across your business, allowing you to manage it more efficiently.

A Sustainable Solution

Save precious water resources by minimising unnecessary water usage.

Product Overview

Key Features and Benefits

- ✓ Controlled flushing reduces water consumption by up to 90%
- ✓ The 'Flush Table' is programmed to flush at specific times depending on the needs of the customer (e.g. weekdays, weekends, office hours, etc.)
- ✓ The unique flush programme can be transferred to multiple sites
- ✓ The unique 'Remote Flush' allows a flush to be triggered outside the normal programme, (e.g. after cleaning or a high-traffic period)

Easy Installation

- ✓ Works in conjunction with the Actiflow Cartridge to create a complete urinal solution
- ✓ Easy installation in discreet areas (e.g. ceiling space) by Citron Hygiene Engineers

Specifications

Dimensions: 84mm x 144mm x 30mm (H x W x D)
Colour: White
